Cordially invite you to the one day

NATIONAL WEBINAR

On

Intellectual Property Rights

On 25th February, 2021 from 10:30 am to 1:30 pm

Intellectual property rights are legal rights that provide creator's protection for their original work. Filing for intellectual property rights not only helps innovators protect their invention, but also provides better funding opportunities. With the increasing focus on innovation and research, the need to learn about intellectual property rights to safeguard their inventions has become crucial for researchers and students. As countries turn to innovation and creativity for sustainable development, there is a need to understand the significance of intellectual property rights in the present scenario. Students will grow on to get into the professional world where they will develop and exercise IP rights. Hence it must be made a part of the academic curriculum. Therefore, this webinar is going to focus on the enrichment of knowledge of intellectual property rights among academicians as well as students.
